In mathematics, a linear map (also called a linear mapping, linear transformation or, in some contexts, linear function) is a mapping  $V \rightarrow W$  between two modules (including vector spaces) that preserves (in the sense defined below) the operations of addition and scalar multiplication.. An important special case is when  $V = W$ , in which case the map is called a linear operator, or an ...

In mathematics, a recurrence relation is an equation that recursively defines a sequence or multidimensional array of values, once one or more initial terms are given: each further term of the sequence or array is defined as a function of the preceding terms.. The term difference equation sometimes (and for the purposes of this article) refers to a specific type of recurrence relation.
