Answer. There are multiple causes of enlarged red blood cells, which is termed macrocytosis, and most of them are easily corrected. Two of the most common causes are deficiencies in vitamin B12 and folic acid, which are frequently associated with anemia, as well.

What causes red blood cells to get bigger? | Zocdoc Answers

Best answer: A man was recently caught in the girl's locker room spying on girls in my town at a high school women's event. When security caught him, he was smart enough to say he identified as a woman, so they had to let him go and explain to the pissed off parents and traumatized girl, they couldn't do anything because he had every right to be there.
