Compressors and blowers installed in chemical plants can efficiently transport and pressurize fluids as well as transfer power. Their classification by type is shown in Table 5.1. This chapter describes the flow oscillations (pressure pulsations) in piping and the vibration of piping caused by suction/discharge flows in such fluid machinery.

Wavelet theory is applicable to several subjects. All wavelet transforms may be considered forms of time-frequency representation for continuous-time (analog) signals and so are related to harmonic analysis. Almost all practically useful discrete wavelet transforms use discrete-time filterbanks. These filter banks are called the wavelet and scaling coefficients in wavelets nomenclature.

Functional analysis is a branch of mathematical analysis, the core of which is formed by the study of vector spaces endowed with some kind of limit-related structure (e.g. inner product, norm, topology, etc.) and the linear functions defined on these spaces and respecting these structures in a suitable sense. The historical roots of functional analysis lie in the study of spaces of functions ...

Since the resolution of the camera is limited (128 × 256 pixel at a frame rate of 9000 frames per second) and moreover distinct rigid body movements in the millimetre range are superimposed the ultrasonic vibration of the transducer tip is not visible though still present. First, the measurements reveal a distinct irregular motion. It should be pointed out that this is a permanent irregularity ...

The First Law of Good Maintenance "In maintenance, when you get really good at something, you're doing it much too often. There has to be a better way, and it's time to do a serious failure analysis," says Jim Schutt, a former maintenance manager and now a corporate executive with Allied Signal.

Both these extremes are to be avoided; which will be done, if the league of Christians, penned by our Savior himself, were in two cross clauses thereof, soundly and plainly expounded: He that is not with us, is against us; and again, He that is not against us, is with us; that is, if the points fundamental and of substance in religion, were truly discerned and distinguished, from points not ...
