The receptor may have a binding site with a specific shape that fits the shape of the chemical messenger. The external messenger may cause the protein to change shape allowing it to relay the message to the inside of the cell, usually by binding to a cytoplasmic protein.

Ch 5: Membrane Transport and Cell Signaling - Biology 1210 ...

The endocannabinoid system (ECS) is a biological system composed of endocannabinoids, which are endogenous lipid-based retrograde neurotransmitters that bind to cannabinoid receptors, and cannabinoid receptor proteins that are expressed throughout the vertebrate central nervous system (including the brain) and peripheral nervous system. The endocannabinoid system is involved in regulating a ...

Endocannabinoid system - Wikipedia

Applications Electronic components. Polycarbonate is mainly used for electronic applications that capitalize on its collective safety features. Being a good electrical insulator and having heat-resistant and flame-retardant properties, it is used in various products associated with electrical and telecommunications hardware.
