A decision support system (DSS) is an information system that supports business or organizational decision-making activities. DSSs serve the management, operations and planning levels of an organization (usually mid and higher management) and help people make decisions about problems that may be rapidly changing and not easily specified in advance—i.e. unstructured and semi-structured ...

Decision support system - Wikipedia

In last week's RLD Monday Morning Minute, I described a brief history of pressure-boosting systems and the introduction of the pre-pressurized tank. This week we continue with the sizing of these tanks for constant-speed systems. All of this is to introduce the terms and data needed for the sizing of bladder tanks in variable speed booster systems.

Hydropneumatic Tanks for Variable-Speed Pressure Boosters ...

This page will compare the devices, development tools, and IDEs all together. However, to prevent this article from getting overwhelmingly long, I've created review pages for each device that cover way more details about the architecture — along with more complete testing notes, different benchmarking variations, and in-depth assessment.

The Amazing \$1 Microcontroller - Jay Carlson

On Linux 2.2 you can get bigger tables than 2G by using the LFS patch for the ext2 filesystem. On Linux 2.4 patches also exist for ReiserFS to get support for big files.

Principle-Based Reserves for Life Products under the NAIC ...

Accuracy and Precision "Accuracy" and "Precision" are terms which are often treated as synonymous. They are not. Precision is a measure of how much information you are offering. Accuracy is a more complicated term, but if it is used at all, it is to measure of how close an approximation is to an ideal. (I have to add a caution here: Richards Fields heads a standards-writing committee concerned ...
