

Definition Of Concentrated Solution

Definition Of Concentrated Solution

Concentrated Definition (Chemistry) A concentrated solution contains the maximum amount of solute that can be dissolved. Because solubility depends on temperature, a solution that is concentrated at one temperature may not be concentrated at a higher temperature. The term may also be used to compare two solutions, as in "this one is more concentrated than that one".

Concentrated Definition (Chemistry) - ThoughtCo

A concentrated solution is one in which there is a large amount of substance present in a mixture. The degree of concentration is measured in moles. Keep Learning.

What Is a Concentrated Solution? | Reference.com

To make (a solution or mixture) less dilute. To converge toward or meet in a common center. 'Dry crystals and concentrated solutions are caustic.' 'The fixtures are movable, in order to direct the concentrated beam of light to your spot of choice in the room.' 'The authors conclude that short-term exposure to concentrated ambient air particles induces a significant inflammatory reaction in the lungs of rats.'

concentrated | Definition of concentrated in English by ...

In chemistry, a solution is a homogeneous mixture of two things - a solute and the solvent that it's dissolved in. Concentration is a measure of how much solute is dissolved within the solvent. There are many reasons for calculating the concentration of a solution, but the chemistry involved is similar whether you're testing the chlorine level in a hot tub or performing life-saving analysis on ...

5 Easy Ways to Calculate the Concentration of a Solution

Often in informal, non-technical language, concentration is described in a qualitative way, through the use of adjectives such as "dilute" for solutions of relatively low concentration and "concentrated" for solutions of relatively high concentration. To concentrate a solution, one must add more solute (for example, alcohol), or reduce the amount of solvent (for example, water).
