New trade theory (NTT) is a collection of economic models in international trade which focuses on the role of increasing returns to scale and network effects, which were developed in the late 1970s and early 1980s.. New trade theorists relaxed the assumption of constant returns to scale, and some argue that using protectionist measures to build up a huge industrial base in certain industries ...

Argument International Relations Theory Doesn't Understand Culture The main schools of thought still cling to an outdated understanding of how civilizations work.

### **International Relations Theory Doesn't Understand Culture ...**

International relations theory is the study of international relations (IR) from a theoretical perspective. It attempts to provide a conceptual framework upon which international relations can be analyzed. Ole Holsti describes international relations theories as acting like pairs of coloured sunglasses that allow the wearer to see only salient events relevant to the theory; e.g., an adherent ...

International trade and the accompanying financial transactions are generally conducted for the purpose of providing a nation with commodities it lacks in exchange for those that it produces in abundance; such transactions, functioning with other economic policies, tend to improve a nation's standard of living. Much of the modern history of international relations concerns efforts to promote ...

Gravity theory of trade. In attempting to understand the pattern of trade in a globalised world, economists have frequently used the gravity model. This was first presented in 1962 by Jan Tinbergen, who proposed that the size of bilateral trade flows between any two countries can be approximated by employing the 'gravity equation', which is derived from Newton's theory of gravitation.

Toward a Marxist Theory of International Law: An Introductory Bibliography Patrick S. O Donnell 8  
Not all of the titles here are by avowed Marxists; those that are not were included for their possible implications for a Marxist Theory of International Law or, perhaps better, what B.S. Chimni defines as an Integrated Marxist Approach to International Law (IMAIL).

New trade theory (NTT) suggests that a critical factor in determining international patterns of trade are the very substantial economies of scale and network effects that can occur in key industries.. These economies of scale and network effects can be so significant that they outweigh the more traditional theory of comparative advantage. In some industries, two countries may have no ...
