A network interface controller (NIC, also known as a network interface card, network adapter, LAN adapter or physical network interface, and by similar terms) is a computer hardware component that connects a computer to a computer network.. Early network interface controllers were commonly implemented on expansion cards that plugged into a computer bus.The low cost and ubiquity of the Ethernet ...

Network interface controller - Wikipedia

The File Transfer Protocol (FTP) is a standard network protocol used for the transfer of computer files between a client and server on a computer network.. FTP is built on a client-server model architecture using separate control and data connections between the client and the server. FTP users may authenticate themselves with a clear-text sign-in protocol, normally in the form of a username ...

Instantly get a snapshot of your website availability and performance from nearly two dozen locations around the world. These are the only free online website performance test tools that give you global results from the end-user's perspective.

Website Performance Test Tools

I can connect to an FTP site but I can't list or transfer files. FTP sessions use two network connections: The control channel is for user authentication and sending commands and The data channel is for transferring files and directory listings.. If you can connect to an FTP server but not transfer files or directory listings, the most likely cause is a blocked data channel.

I can connect to an FTP site but I can't list or transfer ...
