### **Noise Music A History Paul**

Noise music is a category of music that is characterised by the expressive use of noise within a musical context. This type of music tends to challenge the distinction that is made in conventional musical practices between musical and non-musical sound. Noise music includes a wide range of musical styles and sound-based creative practices that feature noise as a primary aspect.

In music, noise is variously described as unpitched, indeterminate, uncontrolled, loud, unmusical, or unwanted sound. Noise is an important component of the sound of the human voice and all musical instruments, particularly in unpitched percussion instruments and electric guitars (using distortion). Electronic instruments create various colours of noise.

Recording History. With Paul back in Britain on April 12th, 1967, his “Magical Mystery Tour” idea firmly in mind, he and The Beatles first concentrated on the immediate task at hand, which was finishing up on helping create the mono and stereo mixes for the soon-to-be-released “Sgt. Pepper” album. He took this time also to introduce this new project to his band for their approval.
