LabBench Activity Key Concepts Diffusion. Molecules are in constant motion and tend to move from regions where they are in higher concentration to regions where they are less concentrated.

Pearson - The Biology Place - Prentice Hall

Diffusion and Osmosis Introduction: Atoms and molecules are constantly in motion. This kinetic energy causes the molecules to bump into each other and move in different directions. This motion is the fuel for diffusion. Diffusion is the random movement of molecules from an area of higher concentration to an area of lower concentration. This will ...

Classroom Lessons. Bug Blitz - A Study in Biodiversity (T. Tomm, Havana Junior High, Havana, IL) I n past years our district had money for field trips to local nature areas for the Butterfly Brigade project; however, budget cuts made it difficult to pay for transportation. I decided to adapt the project to a smaller level using our school garden, which is a quick walk to our front schoolyard!
