Several reviews have been made regarding the methods and application of multi-objective optimization (MOO). There are two methods of MOO that do not require complicated mathematical equations, so the problem becomes simple. These two methods are the Pareto and scalarization. In the Pareto method, there is a dominated solution and a non-dominated solution obtained by a continuously updated ...

Rza I'm planning to purchase a 12v 35amp hour AGM battery for use with a cpap machine while camping. We have also selected a 400w continuous use/800w peak power inverter to use. I'm having a hard time knowing what type of charger to purchase, as I'm on a tight budget.

In general, polymers with a R₂SiO unit are termed silicones, while the SiO repeat unit is also called siloxane. The strength of the SiO bond gives the polymer its thermal and chemical stability, which is important for its use in high-temperature applications [1,2]. In PDMS, the flexibility of the siloxane backbone permits the chains to easily arrange and rearrange themselves so as to place ...
