Water Quality Improvement Solutions | SPEL Environmental

Reduced Food Waste. Project Drawdown defines reduced food waste as: minimizing food loss and wastage from all stages of production, distribution, retail, and consumption. This solution replaces current reported trends in food waste by region. Estimates suggest that 30-40 percent of all food produced worldwide is wasted across the supply chain (Smith, P. et al., 2014).

Water Treatment Solutions | AdEdge Water Technologies

Industrial wastewater treatment describes the processes used for treating wastewater that is produced by industries as an undesirable by-product. After treatment, the treated industrial wastewater (or effluent) may be reused or released to a sanitary sewer or to a surface water in the environment.. Most industries produce some wastewater.Recent trends have been to minimize such production or ...

Industrial wastewater treatment - Wikipedia

AsktheBuilder.com: Knowing how to control erosion can save your yard or driveway. If water has too much force, it will create soil erosion. Controlling the water flow is one solution for reducing soil and water erosion.
