Previous crisis management research has also focussed on producing prescriptive models concerning the stages of crises to assist understanding and future proactive and strategic management of crises (see Richardson (1994), Richardson (1995)). In some cases these models or frameworks have been applied to real life case studies providing descriptive models.

Strategy (from Greek στρατηγία stratēgia, "art of troop leader; office of general, command, generalship") is a high level plan to achieve one or more goals under conditions of uncertainty. In the sense of the "art of the general," which included several subsets of skills including tactics, siegecraft, logistics etc., the term came into use in the 6th century C.E. in East Roman ...

The rapid scale up of the response has been accompanied by an increasing emphasis on measurable indicators and results. These include programme monitoring data, behavioural and biological trends data and evaluation of programmes. The increasing demands on country monitoring and evaluation systems can only be met if better systems are built and supported.
