1. Introduction. Cholesterol is the archetypical sterol, being an essential component of cell membranes throughout the animal kingdom .The first step of cholesterol metabolism is oxidation to an oxysterol .Similarly, precursors of cholesterol can be oxidised to oxysterols .Consequently, oxysterols are a large family of molecules where cholesterol or its precursors have additional oxygen ...

New methods for analysis of oxysterols and related ...

Background. One proposed strategy to expand primary care capacity is to use nurse practitioners (NPs) more effectively in health care delivery. However, the ability of NPs to provide care to the fullest extent of their education is moderated by state scope-of-practice (SOP) regulations.

Impact of state nurse practitioner scope-of-practice ...

A process flow diagram (PFD) is a diagram commonly used in chemical and process engineering to indicate the general flow of plant processes and equipment. The PFD displays the relationship between major equipment of a plant facility and does not show minor details such as piping details and designations. Another commonly used term for a PFD is a flowsheet

INTRODUCTION. Fetal death/stillbirth is one of the most stressful life events. This topic will discuss maternal care after a fetal death/stillbirth, including parental support and counseling, delivery, and postpartum issues. Other issues related to fetal death/stillbirth are reviewed separately: (See "Fetal death and stillbirth: Incidence, etiology, and prevention".)
