Machine learning (ML) is the scientific study of algorithms and statistical models that computer systems use to effectively perform a specific task without using explicit instructions, relying on patterns and inference instead. It is seen as a subset of artificial intelligence. Machine learning algorithms build a mathematical model based on sample data, known as "training data", in order to ...

Abstract. Risk identification is a longstanding, although often neglected, task in projects today. While project managers and teams work to identify risks, they frequently encounter barriers to the risk management process that promote this neglect, resulting in projects that are more prone to challenges in scope, time, and cost expectations.
